*Member of American Association of Nurserymen and Other State and Local
Organizations to Promote the Cause of the Industry*

Our nurseries are located at Semmes, on highway 42, fifteen miles northwest of Mobile. We have over 14,000 square feet of greenhouse space for propagation only. All these greenhouses are equipped with concrete benches. We have more than 60,000 square feet of hotbed space for growing small plants in. We use most of these for Azalea liners, all equipped with an automatically controlled heating system. We have nearly seventy acres under overhead irrigation where we grow thousands of liners as well as field-grown Azaleas and Camellias. We would be happy to have you visit our nursery and will always have someone to show you around.

Our Business Terms

Prices. ALL PRICES ARE NET AND WHEN CASH ACCOMPANIES THE ORDER, NO CHARGE WILL BE MADE FOR PACKING. Otherwise a charge will be made for packing based on cost. No order accepted for less than 25 plants of any one variety of liners.

Carload or truck orders, where we do not have to crate the plants, will carry a 20% discount from catalog prices on B&B stock. NOT on liners or any bare-root stock.

Charge accounts. From unknown persons who have not established credit with us, we ask for well-known trade reference and time for investigating. All accounts are due on receipt of invoice unless other arrangements are made when order is filled.

C.O.D. Shipments. Must be accompanied by 25% deposit and will be considered as cash shipments. If you want us to hold certain items for you, we require a deposit of 25%.

Shipments. Please specify by what method you want your order shipped. We will endeavor at all times to send out all orders as near the date specified as possible and will do everything in our power to insure satisfactory delivery to our customers, but our responsibility ceases upon delivery to carrier in good condition, insofar as damages in transit are concerned. However, we are here to please our customers and will at all times do all we possibly can to help, should you have to file claim for any damages.

If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

It is to be thoroughly understood that we accept any and all orders with the provision that they shall be void, should any injury befall our stock over which we have no control. All orders are subject to any new Government regulations.

Reference. As to our standing and responsibility, we refer you to any bank or business house in Mobile, as well as the better known nurserymen and florists in this country.

BLACKWELL NURSERIES, INC.

AZALEAS •

THIS season we have more Azaleas to offer to our customers than ever before. We have increased our production and have more experienced men to work with the stock; consequently we can give much better value. We have thousands of these plants growing under our sprinkler system, in a mixture of peat and good Semmes, Alabama soil. They have wonderful foliage and heavy root systems and should be a good money-maker for all pot-plant dealers as well as nurserymen and landscape architects.

These plants can be moved almost any time during the year but if you want to give better satisfaction, and of course make more money selling them, get them early, before they start blooming. You will get the benefit of the blooms the first year and you can make a better display in your customers' gardens.

For nurserymen and growers we have this season over a million Azalea liners to offer. To those who have bought them in the past, we need not describe these Azalea liners. We root them in the early summer and transplant to our hotbeds in specially prepared soil. The beds are covered with sash. We have now installed a very modern heating plant for these beds and the plants grow all winter. They are well rooted and branched for spring delivery. *We usually start shipping the liners about the last week of March.* Because of the quality of our plants we were not able to fill all orders last season. We urge you to order early.

This year we are growing thousands of our Azaleas in the full sun. They are making much better plants and are very bushy. They are much nicer than lathhouse-grown plants. These plants are being cultivated with tractors and are watered when necessary, and we can assure you that none better are to be found anywhere. We regret that we have only small sizes to offer. All that we have grown in the past few years in the open field were sold in the season. Although we are very successful in growing these plants in the open field, we suggest that you try it in a limited way at first.

These plants are very easy to grow and if you once use them in your landscaping, you will always use them. If you could see the Azaleas in bloom in Mobile County just once, you would understand better how to use them in your gardens.

AZALEAS •

KURUME AZALEAS

These are most popular, as they are used extensively in pots and also in landscaping for borders as well as mass planting in beds. As a pot plant there is nothing we know of that is superior. We urge you to try a few if you are not already using them.

Christmas Cheer. Hose-in-hose; small deepest red. Small foliage; compact growth.

Coral Bells. Hose-in-hose; small, bell-shaped flowers of a beautiful shade of pink. Small glossy foliage; very compact growth. The favorite of florists for pot culture. We have excellent liners of this variety.

Double Mauve. Hose-in-hose; light mauve flowers entirely cover the plant. Its compactness makes it very good for florist use.

Gardenia Supreme. Hose-in-hose. Beautiful white. Fast grower. Liners only.

Hexe. Hose-in-hose; large, deep red. Excellent dwarf compact growth. Very much in demand.

Hexe d' Saffalare. Hose-in-hose similar to above except larger. New and very popular. Liners only.

Hiawatha. Hose-in-hose. Large, dark red. Compact plants.

Hinodegiri. This is a very popular bright red variety. The blossoms cover the plant in such a manner that you can hardly find a leaf when in full bloom. Compact, slow growth. Very desirable as a pot plant.

Hortensia. Hose-in-hose; medium-sized, deli-

cate pink. Round, fairly large, shiny foliage; heavy but not tall grower.

Mme. Pericat. Hose-in-hose; large light pink flower. Late bloomer, fast grower and very showy.

Mme. Pericat Sport. Beautiful rose - pink sport of Mme. Pericat.

Pink Pearl. Hose-in-hose; pale pink, fading white at center. Profuse bloomer. Early.

Salmon Beauty. Hose-in-hose; large, salmon color. Compact growth. Very showy plant and an excellent variety for pot culture.

Snow. Hose-in-hose; pure white flowers cover the plant. Fairly large, dark green leaves. Very popular with the florist.

Sweetheart Supreme. Salmon-pink. Keeps well. Very fine. Liners only.

INDICA AZALEAS

These Azaleas are the most showy of all in the gardens of the South. The blossoms are larger and the plants grow much faster, making very large specimens in a few years' time. They are wonderful shrubs for landscape use, with dark green foliage all during the year and beautiful flowers in the spring. You can be assured that when you plant an Indica Azalea garden for your client, if you do a good job you will have his gratitude for all time. Then, too, these plants can be grown in much colder climates than was thought a few years ago.

Alba Maculata. Late white. Very bushy grower.

Elegans. Light pink. Heavy foliage; fast-growing, well-shaped plant. Early bloomer.

Fielder's White. One of the best whites among the Indicas. Dark green, hairy foliage; excellent growth.

Fisher Pink. Light pink. Blooms about the same time as Pride of Mobile. Very good, compact growth.

Formosa. Large purple flowers, somewhat lighter than Phoenicia. Large, thick foliage; probably the fastest grower of all the Azaleas.

George L. Taber. A sport introduced by Glen Saint Mary Nurseries. Fast grower; light green foliage. Pink and white variegation.

Indica Alba. Pure white. Light green, hairy foliage; upright growth. Very hardy.

Judge Solomon. A pink sport of Formosa. Same growth and blooming habits.

King's White. Mid-season to late bloomer. Large white and very good.

Phoenicia. Light purple. Dark green foliage and fast, compact grower.

President Clay. Orange-red. Fast, upright growth; midseason bloomer. Very good.

Pride of Mobile. Beautiful watermelon pink—probably the most popular of all Indicas. Large foliage; fast growth, similar to that of Formosa. In Mobile there are plants nearly one hundred years old that are still blooming profusely. The blooms so completely cover the plants at the height of the season that scarcely a leaf is to be seen.

Salmon (Lawson). Medium-sized, salmon-colored flowers. Good upright growth. One of the best; known to nurserymen in the South as Daphne Salmon.

Camellia Japonica

THESE beautiful aristocrats of Southern gardens are each year gaining more in popularity than any other shrub known. The various Camellia shows that are being held each season all over the country bear evidence of this, and part of the credit for the popularity of the Camellia is due to these shows. The organization of the American Camellia Society has created a great deal of interest. If you are selling Camellias, you should join this Society and ask your customers to do the same. It is bound to bring you more business. Ask us for application blanks.

There is and always will be quite a lot of argument in regard to Camellia names. We are listing each variety by the accepted name used by the majority of growers. No doubt some of these will be changed in the years to come as some are being changed now, and when this happens we will always list each variety by as many names as we know it to be sold under. This will prevent you from duplicating varieties.

We are trying to grow all of the better varieties, and not trying to introduce a lot of new seedlings that are good only for understock. We hope to increase our list of varieties as long as we can find new ones to buy that we believe are worth growing. We use several thousand plants each year for understock and we also sell plants for understock, so we use the poorer flowering sorts for this purpose. We also use many *Camellia Sasanqua* for understock and find it sometimes works better than *Camellia japonica*.

This year we cannot recommend too highly our lining-out grade—8 to 12 inch. An illustration of these will be found on page 6. These plants are about the finest we have ever grown and we feel that you should get them as early as possible. By all means place your order early. We had to disappoint many customers last season.

Although we plant this size direct to the field and in open beds under our sprinkler system, it might pay you to grow them in partial shade similar to lathhouse for one year.

All of our Camellias are transplanted many times and have a wonderful root system. We are sure you will find none better anywhere, and once you use some of our plants you will like them. We know you can please your customers with them.

We are listing our Camellias in groups for convenience in pricing. The scarcity, demand, and quality of the blooms determine the group they are listed in. We are not in position to offer liners in all groups, but will as soon as our stock will permit.

Standard Camellias

GROUP 1

Alba Plena. One of the oldest and best-known Camellias. A pure white, full, double sort that is preferred for corsage use. Very susceptible to cold damage. Liners only.

Brilliant. Local name. An excellent variety. Large, very double, bright red. Compact grower with dark green foliage.

Elegans (Chandleri). Rich cherry-red with white variegation. Large flower, 5 to 6 inches in diameter, some of loose peony form and others with thick peony flowers, all on the same plant. Leaves are rich shiny green.

Governor Mouton. Blood-red, often with white blotches. Spreading growth, with twiggy branches.

Herme. Large, semi-double to peony-form flowers of pink, white and red variegation. Faintly fragrant; an excellent garden variety.

Kumasaka. Large, semi-double, deep pink, showing stamens. Good growth and bloom.

Monarch. Very large, deep pink with white variegation. The stamens are so intermixed that often one single flower will resemble a bouquet. Very compact; dark green foliage.

Pink Perfection (Frau Minna Seidel). Very popular shell-pink that is early and blooms very freely.

Prince Eugene Napoleon (Pope Pius IX). Large, double red flowers. Good growth; light-colored foliage. Very popular.

Professor C. S. Sargent. Crimson flowers of peony form. Excellent grower, early blooming.

Victor Emmanuel. Unusually large, peony form, very deep red. Very spectacular red Camellia and probably one that will sell at higher price for many years to come. Excellent grower and late bloomer. We have some exceptionally good buys in this variety.

Lath house scene showing thousands of our Camellia liners. September, 1950.

GROUP II

Gloire D' Nantes. Medium size, dark red, semi-double with very large dark green foliage.

Jarvis Red. Large, semi-double, deep red flower with the stamens showing very prominently. Dark green foliage.

Mme. Adele. Large, rose pink, peony form bloom of very loose construction, with yellow stamens intermixed.

Mme. Strekaloff (Belle Romana). Large flowers profusely streaked crimson. Very upright and strong grower. Thick, glossy foliage.

Sarah Frest. One of the most common and hardiest of this section; always gives some flowers. Rose-pink. of medium size. Very compact-growing plant.

Semi-Double Blush (Celtic Rosea). Beauti-

ful, semi-double, light pink blooms fading to almost white, with yellow stamens. This is an excellent garden variety.

Mixed. In this lot we have plants for use as understock or just shrubs. Some of them are single but most are semi-double and all are fast growers. We are not selling them as named varieties and ask you not to expect good flowering sorts in this group.

Rare Camellias

GROUP I

Adolphe Audusson Variegated. Very large, semi-double, red and white. One of the very best and should be in all collections.

Big Beauty. Large, white, blotched and dashed with pink. Good grower. Large, light green foliage. 12 to 18 in. only.

Davis Rose Dawn. A very beautiful rose-pink Camellia of large size, introduced by one of our local nurserymen. Very vigorous grower with dark green foliage. Much in demand.

Flame. Very large, semi-double, red. An excellent variety for colder sections, as it will open where most other sorts will fail. Long, pointed, slightly twisted foliage. Very good grower.

Glen 40. Large, deep flower of very dark red. Slow grower but one of the best double red Camellias.

K. Sawada. Plant Pat. 431. Pure white, very double flower. Fast, upright grower and prolific bloomer. An excellent variety that should be in every collection.

La Reine Variegated. Semi-double flower 5 to 6 inches in diameter, deep pink to red, blotched with white. Very attractive and outstanding Camellia.

Lindsay Neil. One of the most sought-after Camellias this season. We have the stock of the original plant in Columbus, Georgia, and are proud to offer it.

A field of approximately 250,000 field grown Azaleas. August, 1950.

Magnoliaeflora. Blush color, semi-double. Good compact grower with very shiny leaves. This is the most prized of all Camellias that we have to offer in any quantity and should be in every collection.

Mrs. K. Sawada. Plant Pat. 481. Very beautiful delicate pink, resembling Lady Hume's Blush but larger. One of the best for cutting because it is a heavy producer. Bushy, upright grower with dark green foliage.

Rosea Superba Variant. Unusually large, light pink flower with white variegation. We do not have solid color. Very much like Mathotiana Variant except for color. Fast grower and considered one of the best. It should by all means be in every collection.

St. Andre. Very large, peony-form flower of dark red. Dark green foliage.

Virgin's Blush. New introduction. Large, semi-double flowers of beautiful blush-pink. Very desirable. We can offer some very good values in this variety.

Woodville Red (Martin Roberts). Very large, peony form, strawberry-red. This is one of the newer varieties for this section and is excellent for any collection.

Rare Camellias

GROUP II

Casablanca. Medium rose-pink; formal double. This Camellia opens over a long period and is beautiful in every stage. Its lasting qualities will make it a good cut-flower variety.

Catherine Cathcart. Medium size, double light pink, marbled white. Large, round, light green foliage. A good grower and a fine Camellia.

Debutante (Sara C. Hastie). Large, peony-form, light pink blooms; early. Fast grower with large, serrated leaves of dull green. Very desirable.

Eleanor Haygood. Pale pink, almost blush-color, medium to large flower and when fully open has a few stamens.

Emperor of Russia. Very large, deep scarlet, peony-form flower, with stamens intermixed. Large, dark green foliage. Excellent grower.

Lady Van Sittart Variegated. Large, semi-double, red flower with white variegation. Small, narrow, pointed, dark green foliage.

Lotus. Very large, pure white, semi-double. Long, narrow, light green leaves. One of

the very best semi-double types, and one of the largest.

Mme. Chiang Kai-shek. Fast-growing Camellia with large, dark green foliage. Flower is very large, of the Donckelari type, crimson-red mottled with white.

Margaret Higdon. Large, semi-double, pink bloom, fading to almost white around edges of petals, with stamens intermixed. Large foliage, somewhat serrated.

Mathotiana Rubra (Purple Emperor; Purple Dawn; Wm. S. Hastie). Very large, deep red flowers turning purple as they age, and showing stamens when fully open. Fast grower with large, dark green foliage.

Mathotiana Variant (C. M. Hovey). Very large-flowering type, similar to Purple Emperor except for white blotches through the flower. One of the very best in flowerings as well as growth. Large, dark green foliage with some variegation.

GROUP III

C. N. Hastie. Medium to large, very dark red, peony-like flower. Dark green, round foliage and good grower. A very nice dark red Camellia.

Colonel Firey. Very double, well-shaped flower, 5 to 6 inches across, of brilliant crimson. One of the best red Camellias. Said to be true C. M. Hovey.

Fanny Bolis. Very large, almost single, red flowers blotched with white. Large, dark green foliage; good growth.

Frizzle White. Semi-double, medium to large, waxy pure white flower, intermixed with many yellow stamens. Narrow, light green leaves.

Goshoguruma. Single, deep velvety red with golden stamens. Medium-sized, full green foliage. Slow, very upright growth.

Monjisú. Very nice Camellia. Deep red, splashed with white; very prominent stamens. Dwarf grower; blooms while young.

We can do an excellent job with this spray equipment. A Bear pump and tank with rigging made in our own shops.

Camellia Sasanqua

THESE handsome flowering evergreens offer a wonderful opportunity to nurserymen all over the South. They grow and do well in sections where *Camellia japonica* is a failure, and can be used for screens and hedging, trimmed or otherwise, while the individual plants make fine specimens.

Nurserymen in the vicinity of Fort Worth, Memphis, Birmingham, Atlanta, and all up the Atlantic coast-line and most of the Pacific Coast will be doing their clients a great service and will be well repaid for lining out some of our liners of Sasanqua. They make a much better showing than ordinary broad-leaved evergreens and shrubs, even when not in bloom, and when they come into flower they will add distinction to any garden.

We have heard reports from certain sections of the country where *Camellia japonica* does not do so well, that grafting on *Camellia Sasanqua* enabled these nurserymen to grow many varieties of japonica. This was not where the temperature prevented the growing of japonica, however. We do know that most Sasanquas will stand more abuse than any japonica. We have seen them grow in wet ground where japonica would not grow. We are using more and more *Camellia Sasanqua* for understock each year. The demand for it as understock has increased considerably in the last few years, almost depleting the supply of sizes suitable for landscape use. We advise you to cover your needs on this item as early as possible.

Camellia Sasanqua, Annette. A two-toned variety, similar to Cinderella except more dense in growth and flowers are a deeper pink.

Camellia Sasanqua, Cinderella. Very fast grower of pyramidal habit. Flowers are single, two-toned, white in center shading to pink at edges of petals.

Camellia Sasanqua, Cleopatra. Large, single to semi-double, red flowers. Very dark, thick foliage. Compact. Fine for hedges.

Camellia Sasanqua, Maiden Blush. Fast grower. Medium size, single of delicate pink.

Camellia Sasanqua, Rosea. Single, large, rose-pink flower. Very fast grower.

Camellia Sasanqua, Snow-on-the-Mountain.

Fast-growing, semi-double white that is a very prolific bloomer. Very good.

Camellia Sasanqua, Texas Star. A new variety introduced by Mr. Price Magee, a Louisiana nurseryman. Very symmetrical growth and very dense. Medium size light pink flower.
